## EXPERIENCE

### Frontend Developer, Trend Micro / TrendAI

*Sep 2021 – Jul 2026 · Remote · Irving, Texas*

- Built and maintained 50+ reusable components for the company's global corporate website, localized into 17 languages, as one of three frontend developers on a seven-person cross-functional team.
- Led frontend delivery of a company-wide rebrand and replatform from Adobe Experience Manager to Sanity CMS, cutting new component delivery time from roughly two weeks to two or three days.
- Worked in React, Astro, and TypeScript during the migration, building 20+ components and extending another 20 (about half React), and wrote React daily for about nine months with useState, useReducer, the Context API, and Redux where needed.
- Retired years of technical debt in the migration, raising the site's audited health score from 73% to 81%, cutting crawl warnings by 85%, and consolidating 38 redirects to 3.
- Built region-specific components for individual markets, including custom work for the Japan site, adapting layouts and interaction patterns to local typography and content requirements.
